

The logo for 'woven' is displayed in a white, lowercase, sans-serif font. The letters are closely spaced, and the 'o' and 'e' have a slightly irregular, hand-drawn appearance. The background of the entire page is a blurred image of a gas stove with a blue flame, which is out of focus, creating a bokeh effect.

**Advice on  
maintaining  
and servicing  
of gas  
appliances.**

**GAS SAFETY**

# Gas Safety

We inspect and service all appliances annually and use Gas Safe registered contractors.

In addition, there are steps you can take.

## Carbon monoxide alarms

We encourage tenants with a gas supply to invest in a carbon monoxide monitor. These alarms can be purchased in most DIY stores. Ensure the alarm carries a British or European approval mark, such as a Kitemark.

## Safety precautions

To help avoid the build up of carbon monoxide never block ventilation and ensure that flues are kept clear at all times.

## What are the danger signs to look out for?

- Staining, soot or discolouration around a gas fire or around the top of a water heater or central heating boiler.
- A yellow or orange flame in a gas appliance.
- Onset of symptoms such as tiredness, headache, nausea, giddiness, pains in the chest and stomach.

**If you suspect an appliance is unsafe** turn it off and leave off until it has been checked by a Gas Safe Registered engineer. **Contact us: 028 9042 7211 / 028 7136 0015**

**If you suspect a gas leak Call NI Gas Emergency on 0800 002 001.** Open all / windows and shut off the gas supply at the meter control valve.
